

Reusable Bag

PREVENTION. PROTECTION. PEACE OF MIND.

security chamber & bags

Reusable tamper evident Security Bags

- 1 The zip bridge & slider are both totally enclosed within the chamber cover. This tamper evident enclosure of 2 vital security elements of the bag are the unique feature of the Tebco™ chamber.
- 2 All rivets holding the chamber are totally covered within the bag when closed.
- 3 The zip chain is sewn on bag with the reverse side out to eliminate the bag being broken into via the zip chain & then re-meshed, showing no evidence of entry.
- 4 The bag with binding is externally sewn. Other bag is internally sewn.
- 5 A clear window is only accessible from the inside of the bag. The window is made from clear vinyl and heat welded on the bag with strong bonding.
- 6 The bag can be screen printed with company name or logo for easy identification.
- 7 When the Tebco DC™ Seal is fitted onto the chamber, the tamper evident sealing feature of the bag is completed.

Specifications

Materials: All standard bags are produced from PVC mesh - a tough, reinforced fabric. PVC mesh is a water repellent fabric, therefore the bag provides an adequate level of showerproof protection. Bag can also be made from others materials such as polyester, nylon, canvas, etc.

Locking: The sealing of the bag is engaged by inserting a security seal that fully closed the chamber cover. The chamber is made of clear ABS material for inspection purposes.

Standard colours: Blue, Red and Plastolene as a semi-transparent fabric. Customisation of size, colour and logo printing are optional, subject to a minimum order quantity.

Applications

The reusable bag is specifically designed to secure money, confidential documents and sensitive information. When the tamper evident bags is closed with the Tebco DC™ individually coded seal, the bag security transaction is completed.

"Tebco" and "Tebco DC" are trademarks of Tebco International Inc.
US patent number : US 6533335 and Australia patent number is pending.
